

YURIY BUTSAN

—Front-end developer—

↓ DOWNLOAD RESUME

ABOUT ME

I like web-technologies, it's amazing, funny and interesting to get a non-trivial solution of a complex and confusing UX/UI task. As a result, you have a simple, cool and responsive interface. Of course convenient and intuitive functional is based on a clean and structured code too. So you can do anything and realize that nothing impossible! When I have free time I spend it there with my friends, actively resting and with good mood.
